SUPPLEMENT TO  
REPORT NO. [REDACTED]

25X1X

1. There was intensive flying with single and twin-engine aircraft over Dnepropetrovsk (35°00'E/48°28'N), individual and formation flying being seen. The single-engine aircraft bore a resemblance to the Me-109.
2. The types of formations are reproduced in the attached sketch.

25X1A

Comment:

Whereas previous observations probably referred only to the airfield SW of Dnepropetrovsk and led to the conclusion that this field is occupied by a pilot school (probably a Dosav installation for initial pilot training), this report indicates that the two other airfields SSE of the town and near Osipovka whose existence is known from wartime records are occupied by bomber and fighter units.
